PREFACE.

In presenting to the public the Fourth Number of the *New-Bedford Directory, Town Register, and Shipping List*, it may be deemed a fit occasion to say a few words—for the first time—respecting it.

In consequence of the limited patronage extended to the three former numbers, I had decided, until recently, to suspend the further publication of the work. Although my object had not been so much a pecuniary speculation, as a public convenience, yet I could not but hope that if the public were really benefitted by those publications, they would bestow that share of patronage which would enable me to realize something for my labor, adequate to its amount. But as the third and last number, which was published in September 1839, had become somewhat obsolete, and as a work of this kind seemed to be much needed, I have been induced by the solicitations of others to publish the present number.

The *Directory & Register* contains all the information usually found in works of this kind. Seven hundred and thirty-three names have been erased from the "Old Directory" and one thousand three hundred and sixty-seven added to the new, making two thousand one hundred alterations, exclusive of removals, which have been very numerous, giving an increase of six hundred and thirty-four names. The place of residence, occupation, profession, &c., of every individual in Town has been ascertained as nearly as possible, and, in every case where it was practi-

cable, by a personal application to the individuals themselves. In many instances, however, this was impossible, and the information being obtained from third persons, will no doubt be found incorrect. It has however been my constant aim to render the work as complete and accurate as possible. The *Register* has also been prepared with much care, and with a view to its being both interesting and profitable. The amount of matter in this portion of the work is about twenty-five per cent. greater than in that of any former edition.

With respect to the *Shipping List*, great pains have been taken, and much labor expended to make it a valuable and correct repository of useful data upon this important branch of American Industry. It will no doubt be found incorrect in many particulars, as the information has necessarily been derived from various sources; but the author has aimed to make it as correct as it was possible for a work of the kind to be.

Abstract tables have been inserted in this part of the work, showing the number and class of vessels, with their amount of tonnage, which has sailed from the UNITED STATES on Whaling Voyages, during each of the years, '38, '39, and '40, designating the particular Ocean for which they were cleared;—Also, Tables showing the amount of Sperm and Whale Oil, Whalebone and Spermaceti Candles, exported during the year 1840, with the value of the same, designating the particular amount shipped to each country;—together with the total quantity and value of the same articles exported during the years '38 and '39. These tables, in addition to the information contained in the former editions, will not only be of present utility, but, if the publication of the work be continued on the present plan, will afford valuable and interesting information for future calculations and estimates in this important branch of business.

Whether it will be so continued will of course depend entirely upon the amount of patronage it may receive. Although the sale of the last edition was barely sufficient to meet the expenditure of cash, leaving little or nothing for my own labor and trouble, yet the present one has been greatly enlarged, at least in amount of matter; whilst at the same time the price has not been increased. The public are therefore reminded, that if they desire the continuance of the work, they must come forward and purchase the entire edition. It would also be well to consider, that as each copy is worth twice the sum demanded for it, every one can, upon that principle, afford to take at least two copies.

I would also embrace this opportunity to return my sincere thanks to the public generally, for the kindness and courtesy with which they have answered my various and repeated inquiries; and to those Collectors of the Customs of whom I have solicited information, especially for the promptness with which they have complied with my requests. There is however to this, one exception. From the Collector of the District of Bristol and Warren, I have been unable to obtain a single line in answer to many letters which I have directed to that officer, and duly mailed, *postage paid*, respectfully soliciting a list of Whale Ships owned in that District, and each letter giving assurances that any reasonable charge for said list would be promptly paid upon receipt thereof. I have however been enabled after much trouble and delay, through the politeness of Messrs. GEO. H. PEARCE, of Bristol, and WM. H. DRISCOL, of Warren, to obtain the necessary information.

The appearance of the work has been delayed some time beyond the period at first contemplated, in consequence of the great difficulty in obtaining the desired information from Bristol and Warren—by the accumulation of labor in

preparing it—and by circumstances entirely unforeseen in the commencement.

Many errors, it is feared, have been overlooked in the correction of the proof, in consequence of the great haste with which that part of the labor has been performed. On the whole, however, I have endeavored that the work should be comparatively free from errors, and worthy of general patronage.

HENRY H. CRAPO.

THE NEW-BEDFORD GUARDS.

This is a company of Light Infantry, and was organized in January, 1841. It is provided in the By-Laws that the Annual Meeting shall be held on the 22d of February, except when it happens to fall on Sunday, when it is to be held on the day following. The town of New-Bedford voted to grant the use of the upper part of the old Town Hall for an Armory, and appropriated a sum of money sufficient to put it in a suitable condition for the purpose. It has accordingly been fitted up with racks, shelves, &c. and has also been handsomely decorated by the Company with curtains, flags, mirrors, &c. The muskets and equipments are arranged, in the most tasteful and showy manner around three sides of the Hall. In addition to the State uniform, which the company is obliged to wear at the parades required by law, they have adopted the beautiful Polish cap and fountain plume, to be worn on extraordinary occasions. A band of music, consisting of nineteen pieces, which were purchased by the voluntary contributions of the citizens, is attached to the corps. The number of members, excluding two markers and a surgeon and assistant surgeon, amounts to *one hundred*. This is believed to be the largest company in the Commonwealth. This company belongs to the 2d Battalion of Light Infantry, 2d Brigade and 1st Division of Massachusetts Militia.

NEW BEDFORD ALMS HOUSE.

This Asylum for the poor is situated in the southerly part of the town, and on the westerly side of "Clark's Point." Its location is pleasant and healthful. It is attached to a farm of seventy-five acres, extending entirely across the point from Acushnet river to Clark's Cove. This farm was purchased of Perry Russell in 1828, for the sum of \$4,700. The house then standing thereon being insufficient for the wants of the town, a building which had been previously occupied as an Alms House on Sixth-street, within the village, was moved down and joined to it. These, together with such alterations and additions as have since been made, are capable of affording comfortable accommodations for seventy-five or eighty inmates. In the winter of 1839-40, during the prevalence of the Small Pox, another building was erected about thirty rods from the principal house, of sufficient size to admit ten or twelve patients, and which was immediately occupied as a Small Pox Hospital. It has since been occasionally occupied by the same class of patients. In 1829 about 5,800 feet of salt-works were built near the west shore, which make annually from 1200 to 1500 bushels of salt. The farm is at present under a good state of cultivation, and is estimated to be worth \$10,000. The products for the last ten years have gradually increased in quantity, and the farm in value. A considerable portion of the labor, both in the house and on the farm is performed by such of the inmates as are capable of laboring. The increase in the number of inmates is not very rapid. In summer it is now about forty—in winter nearly seventy. The average number in 1836 was thirty-four; in 1837, thirty-six; in 1838, forty-two; in 1839, forty-five; and in 1840, fifty.

The great advantage to be derived in populous towns, both in comfort and economy, from placing the poor upon "town farms," is now universally admitted, although not universally practiced. In 1840, there were in this State, 180 Alms-Houses, nearly all of which were attached to farms, comprising in the whole, 16,678 acres of land.

The Alms House in New-Bedford is occupied for a three-fold purpose:—

First—As an “Alms House” proper—being a home for the unfortunate houseless,

Second—As a “Marine Hospital,” Congress never having deigned to furnish a better one. The number of sick seamen entitled to hospital aid, admitted in 1839, was twenty-seven; admitted in 1840, forty-three. Total in two years, seventy.

Third—As a “Work House.” By a vote of the town, passed April 1838, such part of the Alms House as might be assigned by the Overseers of the Poor for that purpose, was constituted a “Work House.” Under this provision commitments have been made by the Police Court, from time to time, of persons found guilty of certain offences, and having a lawful settlement in this town.

The children belonging to this establishment are instructed at the public school, which, by recent arrangements, will be hereafter located upon the farm. The inmates are assembled once every Sabbath for religious instruction, all the clergymen in town supplying alternately. The Overseers of the Poor meet regularly at the house at least once in each month, and as much oftener as circumstances may require. Mr. Nathan Chase is the present superintendent.

THE PARKER HOUSE.

This new and splendid Hotel was commenced in May last, by the Hon. JOHN A. PARKER, whose name it bears, and the work is now so far advanced, that it will probably be opened in the Fall for the reception of company. It is situated on Purchase street, the principal avenue of entrance into the town from the North, about half a mile from the Rail Road Depot, and extends from Elm to Middle streets, making a front of 180 feet. When completed according to the plan, which was drawn by Major Russell Warren, of Providence, it will be one of the most spacious and commodious public houses in the country. It is four stories high including the basement, contains a dining hall twenty-four feet wide and seventy-two feet long, one hundred and ten rooms beside, and a large bathing establishment. The front portico is thirty feet long, projects seven feet, and is supported by four columns with ornamental caps. There is also a private entrance on the North. An observatory on the top of the North wing commands a fine prospect of the town, harbor and bay.

It is understood that it is to be kept by Mr. Sanford Horton, at present, the keeper of the Mansion House, formerly of the Chapotin House, Providence; and from his reputation as an obliging and liberal host, the public have the best assurance that their entertainment will be in keeping with the size and convenience of the edifice.

POPULATION.

New Bedford including Fairhaven, was incorporated in 1787, and in 1810 contained a population of 5,651. In 1812 the Town of Fairhaven was incorporated, which in 1820 contained a population of 2,733, and in 1830, 3,034; making an increase in ten years of 11 per cent. The population of New-Bedford in 1820, was 3,947, and in 1830 7,592; making an increase of 92 per cent. in the same space of time, or 9 per cent. per annum.

The population of New-Bedford, as taken by Simeon Bailey, in July, 1836, was 11,113 making an increase of nearly 47 per cent. in six years, or about 8 per cent. per annum.

The population, as taken by the Assessors, May 1st, 1837, was 11,504, making an increase of only 2 per cent. for the year 1836.

The population, taken by Henry H. Crapo, May 1st, 1839, was 12,354, making an increase of about 4½ per cent. per annum for the two preceding years. The colored population at this time was 1051, consisting of 709 males and 342 females.

The population, as found by the Assessors in May, and returned into the office of the Secretary of the Commonwealth in June, 1840, was 12,585.* The United States Census, as found at the same time by B. T. Congdon, was 12,087.

The discrepancy between the population as taken by the Assessors, for the State, and by Benjamin T. Congdon, for the United States, is owing to the fact, that in the latter census no persons are included excepting

* By the Assessors' returns it appears that there were 4,915 Ratable Polls, of which only 3,129 were assessed.

those having an actual residence here, either as heads or members of families at the time when taken. This must necessarily be far short of the actual population, as there is at all times a large number of persons "at sea," who, whilst absent, have no permanent and established place of abode in town, but who, nevertheless, to all intents and purposes, are inhabitants of the place.

The population has manifestly increased rapidly within the last year, and at the present time most probably exceeds 13,000.

The “Grammar School” is a public Institution, (the School law of the Commonwealth requiring that such school shall be maintained), and was opened in June, 1837.

By the regulations of the School Committee, the admissions to the School are made semi-annually—the children of each admission forming a distinct class. Each class pursues a certain course of study for every six months, and is permitted to remain two years; consequently there are four classes in the School. No children are admitted under twelve years of age; and Candidates for admission are examined in Spelling, Reading, Writing, and the elements of English Grammar. They must

also be thoroughly acquainted with Smith's Geography, and the second part of Emerson's Arithmetic.

The studies of the School are those usually taught in the Academies of the State—being the higher branches of an English Education. Those children whose parents or guardians desire it, can attend to the study of the French, Latin and Greek languages.

Whole number of pupils admitted since the opening of the school, 128 males, 111 females,— Total 239.

Five Classes have completed their course of study and graduated from this school since its commencement, making an aggregate number of 85 males and 71 females,— Total, 156.

Present number of pupils, 43 males, 40 females,— Total, 83.

Nine of the young ladies educated at this school are now employed as Teachers in the Public Schools.

Aggregate number of children of all ages who attended the Public Schools during the year ending June 1st, 1840, 2,158; average daily attendance for the same period, 1,150.

Aggregate number of children of all ages who attended the Public Schools during the year ending June 1st, 1841, 2,267; average daily attendance for the same period, 1,200.

Amount appropriated by the Town for the support of Public Schools for the year 1840, viz:—

For pay of Teachers,	\$12 000
For fuel, repairs of houses and other necessary expenses,	2,600
	\$14,600

For the year 1841, viz:

For pay of Teachers,	\$12,900
For fuel, repairs of houses and other necessary expenses,	2,500
	\$15,400

Besides the edifice and grounds, philosophical apparatus, and library of about 1500 volumes, the Institution has a fund of about \$12,000.

In addition to the above, there are *twenty-nine* Private Schools of various grades, each of which is in operation, on an average, ten and a half

months in the year; and in which are taught 597 children. The amount paid for tuition in these schools, during the past year, is \$5,221.

The number of children taught in the several schools, during the year ending June 1, 1841, and the amount of Teachers' salaries for the ~~same~~ period, are as follows:—

LIST OF VESSELS

EMPLOYED IN THE WHALE FISHERY,

BELONGING TO THE UNITED STATES,

ON THE FIRST DAY OF OCTOBER, 1841.

ABBREVIATIONS.—Atl. for Atlantic; S. A. for South Atlantic; Ind. for Indian; P. for Pacific; N. Z. for New Zealand; bk. for bark; bg. for brig; sch. for schooner. In all cases not otherwise designated the name given is that of a ship.

Note.—In most cases the destination of each vessel is correct as given—although in some instances a vessel is cleared for one place, and proceeds, before the expiration of the voyage, to another. The aggregate, however, of the whole fleet, is not perhaps very sensibly affected by such partial deviation.

DISTRICT OF NEW-BEDFORD, Mass.
